

## Condition Input

User instruction  $u$

“a truck cuts in  
from my left on  
a rainy street”

Fuse  
 $F_\phi$

Working prompt  $\tilde{u}_0$

Auxiliary references  $\mathcal{X}$

Scene specification  $s_0$

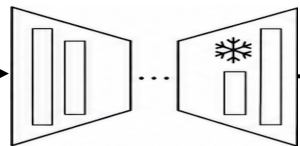

Condition plan  $c_t$

Plan  
 $\mathcal{L}_\eta$

## Frozen DriveDreamer-2 Backend

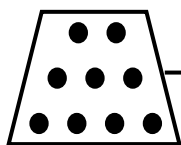

DriveDreamer-2  $\mathcal{G}_{DD2}$

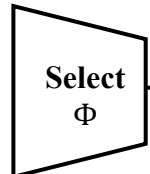

Attempt  $\bar{V}_t$

Denoising

Source scene  $b_t$

$\arg \max_d \Phi(d, s_t, c_t)$

## Evaluation, Refinement & Output

Perception evaluator

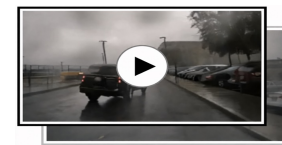

pass

Acceptance gate  
 $S_{perc} \geq \tau$   
and direction

fail

Accepted video

Refinement

**Rung 1** refine condition and prompt  
**Rung 2** inject close-range target path  
**Rung 3** reseed
